Professional Summary

Cloud & Software Engineer with 7+ years of experience in architecting iOS and Android smartphone applications, developing secure software systems, and applying DevOps skills across AWS, Azure, and GCP. Strong background in cybersecurity, DevOps, and scalable infrastructure. COMPTIA Security+ and AWS Certified Solutions Architect. Proven ability to lead cloud migration, develop microservices, and implement security best practices (NIST 800-53, IAM, encryption).

Certifications

- **COMPTIA Security+** (*Expires 2028*)
- **ISC2 Candidate** (2024)
- **AWS Certified Solutions Architect – Associate** (2022-2025)
- **AWS Certified Cloud Practitioner** (2022-2025)
- **Cybersecurity Certificate – Old Dominion University (ODU)** (2022)

Technical Skills

Languages: Python (Ranked top 89% on LeetCode), C++ (top class performers), C#, Swift, Objective-C, JavaScript, Dart, R, XML, Typescript, PHP, SQL, Bash

Cloud & DevOps: AWS (EC2, RDS, VPC, IAM, S3, Lambda), Azure, Google Cloud Platform, Docker, Kubernetes, GitLab CI/CD, Terraform, Jenkins, Atlassian (JIRA, Bitbucket)

Web & Mobile: HTML, CSS, JavaScript, WordPress, Firebase, MySQL, MongoDB, Android, iOS, Unity

Cybersecurity: NIST 800-53, CVSS, Wireshark, Kali Linux, Burp Suite, RHEL, Encryption (at rest/in transit), IAM, Active Directory, Entra ID, Security Groups

Tools: Git, GitLab, Linux, PowerShell, Oracle VM, Cameo, Enterprise Architect, AdMob, Google APIs

Professional Experience

Software Engineer & Founder

Reef Squid — Oct 2025 – Present (*self-employed*)

- Conceptualized and founded Reef Squid, establishing the company's technical vision and product roadmap focused on developing proactive cybersecurity solutions
- Architected and engineered the company's flagship product, the Reef Squid Pentest Toolkit, creating a comprehensive suite for vulnerability assessment
- Designed, developed, and currently manage the corporate website, establishing the primary digital presence and marketing platform for the company

DevOps Engineer & Founder

VPC Quant — *Nov 2023 – Present (self-employed)*

- Built microservice-based architecture using Docker containers and MongoDB
- Configured secure VPCs across AWS, GCP, and Azure with encryption at rest/in-transit
- Launched scalable WordPress instances using AWS Local Zones
- Automated infrastructure provisioning and CI/CD pipelines using Git and GitLab
- Designed cloud-native solutions and integrated security frameworks (IAM, NACL, TLS)

Senior Software Developer

Colorado Professional Resources — *Oct 2024 – Mar 2025*

- Developed code for satellite software systems
- Supported code-to-staging of the SDLC, automated testing and simulation environments
- Conducted onboarding and technical training for junior developers
- Applied scripted system tests and automation using Linux and PowerShell
- Led technical presentation and troubleshooting sessions with Junior Developers

Cybersecurity Scientist

NAVSEA – Newport — *Jul 2024 – Sep 2024*

- Reviewed IT systems against NIST SP 800-53 and federal security standards
- Participated in strategic cybersecurity reviews and vulnerability scoring
- Delivered briefings on cybersecurity risks and compliance requirements

Software Developer & Founder

Whoa Apps — *Aug 2018 – Aug 2020 (self-employed)*

- Designed and launched mobile applications (iOS/Android) and websites
- Integrated Google APIs, Firebase, MongoDB, and DynamoDB into consumer apps
- Developed accessible technology prototypes, including object detection for the blind
- Led business development, resulting in enterprise client deal resulting in £40,000+ earnings in one month from launch of iOS/Android applications

Software Developer & Founder

A la Carte Apps — *Feb 2016 – Aug 2018 (self-employed)*

- Released six iOS applications using Swift, Objective-C, and Firebase stack
- Managed full application lifecycle including SEO, AdMob, and social media campaigns
- Presented app concepts at VC events, earning multiple private invitations

Education

Old Dominion University — *Norfolk, VA*

M.S. Computer Science, May 2023 | GPA: 3.47

Relevant Courses: Advanced Machine Learning, Cryptography, Data Science, IoT Security, AI, Algorithms

Undergrad transfer work at ODU | GPA: 3.78

Courses: C++ (top class performer), Python, Computing Fundamentals

Florida State University — *Tallahassee, FL*

B.S. Economics, Aug 2002

Activities: FSU Football (Fullback), TKE Fraternity – VP, Philanthropy Chair
